Skills Summary

- **Testing Expertise**: STLC, Test Case Design, Functional Testing, Regression Testing, Mobile Testing, API Testing, UAT, End-to-End Testing.
- **Mobile QA Skills**: Android Testing, iOS Testing, ADB, logcat, Charles Proxy, Firebase, Device Compatibility Testing.
- **Technical Skills**: Java, SQL, HTML, CSS, API Testing, Postman.
- **Tools**: JIRA, TestRail, BrowserStack, Mixpanel, Amplitude, Charles Proxy, Android Studio, Xcode, MySQL, Cursor AI.
- **Platforms**: Android, iOS, Web, Linux, Windows, macOS.

Experience

QA Engineer, Kutumb - Bengaluru   *Sep 2025 - Present*

- Performed **mobile application testing** on **Android and iOS** platforms to ensure high-quality releases.
- Executed **functional, regression, smoke, sanity, and exploratory testing** for mobile features and updates.
- Validated **API integrations** using Postman and ensured seamless communication between mobile apps and backend services.
- Tested app performance, usability, and compatibility across multiple devices, OS versions, and screen sizes.
- Used tools such as **ADB, logcat, Charles Proxy, Firebase, BrowserStack, Postman, and JIRA** for debugging and issue tracking.
- Collaborated with developers and product teams to improve app stability and user experience.

QA Engineer, Moolya Software Testing Pvt Ltd - Bengaluru   *Mar 2025 - Sep 2025*

- Tested **Android, iOS, and Web applications**, ensuring quality across multiple platforms.
- Performed **functional, regression, exploratory, and usability testing**.
- Maintained and updated test suites using **TestRail**.
- Created **mind maps** to visualize test coverage and improve test planning.
- Collaborated with **cross-functional teams** to streamline testing processes.

QA Engineer, BANGDB - Bengaluru   *Apr 2023 - Feb 2025*

- Designed and executed manual test cases for **web applications, APIs, system testing, and performance testing**.
- Implemented end-to-end testing following the **STLC process**.
- Performed **functional, regression, integration, and smoke testing** across **Web, Android, and iOS**.
- Utilized tools such as **Charles Proxy, Android Studio, BrowserStack, Xcode, MySQL, Amplitude, Mixpanel, and Firebase**.
- Identified, documented, and tracked defects using **JIRA**.
- Contributed to **automation testing** using **Java and Selenium**.
- Worked in **Agile/Scrum** environments and participated in sprint ceremonies.
- Used **Cursor AI tool** to assist in test analysis and debugging.
